INDEX.

ABSORPTION AND ADSORPTION, 375
Acetylene, Acetic acid from, 398
Acid, Blue perchromic, 186
—— from acetylene, Acetic, 398
—— in plants, Prussic, 331
—— or Pyrogallol, Pyrogallic, 336
Acids and vegetation, Sulphurous and sulphuric, 306
——, Soaps from naphthenic, 148
Actinium emanation, Molecular weight of, 34
Adams's photographs, The late Mr. Franklin, 66
Adriatic, Marine vegetation of the, 146
——, Plankton (flagellates and green algae) of the, 306, 330
Adsorption, Absorption and, 375
Aëronautics, Wireless telegraphy in, 279
Aëroplanes, Testing aneroids for use on, 400
——, The Schilowsky gyroscope applied to ships and, 209
Air in plant physiology, Use of liquid, 28
——, Liquid, 333
—— records at Batavia, Remarkable upper, 189
—— research, Upper, 115
Air-sac in a Lemur, Peculiar, 194
Albedo, The Earth's, 65
Alchemical Society, The, 128
Algae and sponges, Symbiosis between, 112
——, Diastase in red, 186
——) of the Adriatic, Plankton (flagellates and green, 306, 330
——, Symbiosis between freshwater molluscs and, 397
Alkaloids and colour changes, 323
Alleghany divide, The, 31
Alloys, Nomenclature of, 67, 148
——, The colour of metals and, 268
Almanac" for 1916, "The Nautical, 184
Alps, Vegetation above the snow-line in the, 112
Altruism, Infectious, 340
Aluminium, and Duralumin, Exposure tests of copper, commercial, 30
—— in the vegetable kingdom, Distribution of, 268
America and the dyestuff industry, 431
America, Earthquakes in North, 210
American Entomological Society, The, 284
—— reflectors, Great, 27
—— goatsuckers, New family of, 406
Ancestry of domestic fowls, 376
Andes, Pillow-lavas in the, 269
Aneroids for use on aëroplanes, Testing, 400
Anglo-Swedish antarctic expedition, An, 221
Animals, Chemical test of pregnancy in, 220
——, Protective changes of colour in, 195
Antarctic expedition, An Anglo-Swedish, 221
—— Expedition, The Imperial, 114, 372
—— nematodes, 194
Antiquities, Egyptian metal, 68
Ants, Caterpillar reared by, 231
Aporeïne and its salts, 370
Arc, The Twilight, 296
Archipelago, Vegetation of the Arctic-American, 146
Arctic-American Archipelago, Vegetation of the, 146
Arctic expeditions, Ill-fated, 399
Argyllshire, Abnormal stream transport in Perthshire and, 188
Arithmetic, Russian peasants', 203, 254, 301, 323, 419
Arsenic, The forms of, 29
Astronomical Society of the Pacific, The October *Journal of the*, 27
—— ——, The London, 284
Astronomy and modern novelists, 121
——, Meteoric, 96
—— Notes, 26, 65, 111, 145, 184, 219, 266, 305, 329, 369, 394, 430
Atkinson, Helen A. S., 419
Atlantic coastline, Permanence of the, 268
Atomic hypothesis, The present position of the, 344
—— weight of lead, 376
Australia, Federal capital of, 269
Australian weather forecasts, 432
Autotomy in *Linckia*, 73
Axon, T., 50

BACTERIA, DENITRIFYING MARINE, 66
——, The purple sulphur, 185
Badgley, W. F., 108
Balloon ascents at Upavon during 1913, Pilot, 150
Ballstone, 308
Barclay, J. Gurney, 108
Barlow, E. W., 419
Barnard's observations of Halley's Comet, Professor, 329
—— —— —— Novae, Professor, 266
Batavia, Remarkable upper-air records at, 189
Bather, Dr. F. A., 329
Beads, Platinum metals in cupellation, 114
Bee, Tropism of horned, 35
Beeswax of the Viking period, 29
Beetle, The water-, 222, 270
Beetles, Myrmecophilous, 73
——, Respiration in water-, 315
Benham, Charles E., 45, 351
Bickerton, Professor A. W., 10, 55, 83, 140
Binocular microscope, The, 226
Biogeography of the tsetse-fly, 68
Birds, Bright colours of male, 406
——, Luminous, 50
Bivalves, How cuttlefishes deal with crabs and, 35
Black Sea ports, Russian wheat and the, 68
Blood films, Notes on, 32
Bones, Cetacean pelvic, 153
Botany, Elizabethan, 60
—— Notes, 27, 66, 112, 146, 185, 267, 306, 330, 370, 397
Bowell, E. W., 373
British Association, 1913, Economics at the, 60
—— —— grants, 14
—— ——, The Australian meeting of the, 375
—— Folk Museum, A, 136
British Journal of Photography, The diamond jubilee of *The*, 314
British Rainfall, 1913, 401
Brittany, Frilled shark off the coast of, 406
Britton, L., 195
Bronze, 220
Bruce, Dr. William S., 92
Burke, John Butler, 304
Butterfield, W. Ruskin, 136

CACTI, TRANSPIRATION IN, 398
Cairns, J. E., 61
Calcium carbonate, The solubility of, 147
Canada, Archaean geology in, 431
Cancer, Coal-tar, pitch and, 398
Cape Observatory," Sir David Gill's " History of the, 27, 66
Carbon dioxide, Carbon and, 332
Carbonate, The solubility of calcium, 147
Caspian Sea, A recent lowering of the level of the, 187
Castor seeds, Detection of, 371
Caterpillar reared by ants, 231
Caucasus, Travel in the, 30
Cavers, Professor F., 27, 66, 112, 146, 185, 267, 306, 330, 370, 397
Cell-dimensions in dwarf plants, 66
Cement works, Estimation of the dust fall near, 332
Cetacean pelvic bones, 153
Chambers, W. F. D., 260
Charts, Variable star, 298
Cheavin, W. Harold S., 225, 270, 313, 336, 374, 402, 435
Chemistry and the war, 370
—— Notes, 29, 67, 113, 147, 186, 220, 268, 306, 332, 370, 398, 431
—— ——, Engineering and Metallurgical, 29, 67, 114, 148, 187, 220, 268, 307, 333, 371
—— of the Radio-elements, The, 24
—— —— —— forest, The, 50
—— —— tobacco and nicotine, Some notes on the, 46
——, Some interesting features of photo- 389
Chinese flea-trap, 36
Chlorine in rain and snow, The nitrogen and, 268
Claridge, The Rev. J. T. W., 204
